

# SuperSun 66

(Trademark pending)

Proven to be a top performer in many countries. A medium maturity variety coupled with high yield, excellent standability and large plump seeds makes it popular with sunflower growers around the world.

<b>Medium/Full Season Maturity</b>	<b>SuperSun 66 is a medium to full season maturity variety which enables it to maximise yield in a wide range of conditions.</b>
<b>Yield Potential</b>	<b>SuperSun 66 has shown excellent yield potential in testing and production throughout the world since commercial release in several countries.</b>
<b>Disease Resistance</b>	<b>SuperSun 66 has an excellent level of resistance to the major sunflower diseases including leaf rust, albugo white blister and alternaria.</b>
<b>Oil Production</b>	<b>SuperSun 66 produces a high percentage of poly unsaturated oil. It also has many other desirable agronomic traits including high levels of lodging resistance from its thick stalks.</b>
<b>Semi—pendulous Heads</b>	<b>SuperSun 66 has semi—pendulous heads which helps to reduce sunburn, head rot and bird problems.</b>
